Resounding International Relations M.I. Franklin, 2016-09-23 This book explores a provocative area of inquiry for critical theory and research into world politics and popular culture: music. Not just because political science barely engages with anything musical, but also because it is clear that many opportunities for critical scholarship and reflection on global politics and economics are present in the spaces and relationships created by organized sound. It is easy to focus on the textual elements of music, but there is more at stake than just the words. Critical reflection on the intersections between music and politics also need to take into account the visceral and non-verbal elements such as counterpoint and harmony, polyphony and dissonance, noise, rhymes, rhythms, performance and the visual/aural dimensions to music-making.

Christian Theology in Asia Sebastian C. H. Kim, 2008 The majority of the world's Christians now live outside Europe and North America, and global Christianity is becoming increasingly diverse. Interest in the history and theology of churches in non-Western contexts is growing rapidly as 'old world' churches face this new reality. This book focuses on how Asian Christian theologies have been shaped by the interaction of Christian communities with the societies around them and how they relate to the specific historical contexts from which they have emerged. The distinctiveness of Asian Christianity is shown to be the outcome of dealing with various historical challenges. Questions addressed include: • How does Asian Christianity relate to local socio-cultural, religious and political environments? • What is distinctive about the historical development of Asian theologies? • How have Asian theologies contributed to contemporary theological discussions within world Christianity?

Concepts are presented from learning-centred and learner-centred perspectives, while related learning and teaching principles provide ideas about how one may enable others to learn more effectively. Written for people preparing to become adult educators, *Making Sense of Adult Learning* provides background information about the nature of adult learning and the characteristics that typify adult learners. Hollywood Theory, Non-Hollywood Practice Annette Davison,2017-07-05 Relatively little has been written about film scores and soundtracks outside of Hollywood cinema. *Hollywood Theory, Non-Hollywood Practice* addresses this gap by looking at the practices of film soundtrack composition for non-Hollywood films made after 1980. Annette Davison argues that since the mid-1970s the model of the classical Hollywood score has functioned as a form of dominant ideology in relation to which alternative scoring and soundtrack practices may assert themselves. The first part of the book explores some of the key theoretical issues and debates in film studies and film music studies. The second part comprises a series of case studies of non-Hollywood scores. Starting with Jean Luc Godard's *Pr m: Carmen* (1983), Davison argues that the film's score offers a deconstruction of the relationship between sound and image proposed by classical Hollywood film. Derek Jarman's *The Garden* (1990) takes the debate a step further in its exploration of the possibility that a film's soundtrack may be liberated from slavery to the image track. *Wings of Desire* (1987) directed by Wim Wenders offers, Davison believes, a negotiation between classical and alternative scoring and soundtrack practices; while David Lynch's *Wild at Heart* (1990) actually fully integrates scoring and soundtrack practices so that sounds and dialogue are used in musical ways. Seeking to stimulate debate about the aesthetics and interpretation of film scores and soundtracks in general, this book develops an important synthesis of film studies and musicology.

Paradoxes of Culture and Globalization Martin J. Gannon, 2007-06-29 A truly extraordinary book! The range of knowledge revealed by the author is quite astonishing and the material presented is done so in a clear and unambiguous writing style. The book includes astonishingly varied perspectives on issues that will impact the hoped-for positive consequences of globalization. I felt I was being informed by an expert who grasps the complexity of the issues involved in ways that make them clear and useful. If I was teaching a course that had anything to do with globalization and/or culture, I would assign this book—and if I knew of someone who was being assigned to another country, I would require him or her to read this book. —Benjamin Schneider, Valtera Corporation and Professor Emeritus, University of Maryland What is a paradox?
